EDUCATION

California State University, Fullerton, B.S. in Computer Science
Expected: *May 2028*
Relevant Coursework: Object-Oriented Programming, Python, Data Structures & Algorithms, Cybersecurity Foundations & Principles, Compilers & Languages, File Structures & Databases, Software Engineering, Computer Organization & Assembly Language, Edge AI, Introduction To Machine Learning

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, JavaScript, SQL, Kotlin, Swift, HTML/CSS
Frameworks: React, Next.js, Node.js, FastAPI, PyTorch, Pandas, SQLAlchemy, Tailwind CSS
Tools: PostgreSQL, MongoDB, Docker, Git, Linux, Jira, Claude Code, Codex

WORK EXPERIENCE

Onda - Hang Better (Stealth Startup) **Irvine, CA**
Software Engineering Intern | React Native, Expo, TypeScript, Google Cloud Platform, Firebase *Jun 2026 - Present*
- Shipped an in-app discovery search used across 2 app surfaces, ranking results by rating, reviews, distance, and open status with React Native and TypeScript
- Reduced redundant API calls by ~80% through TTL caching, photo persistence, and response field masks, lowering external API consumption while preparing the caching layer for Firebase
- Collaborated with engineers to integrate frontend, API, and caching requirements across multiple mobile application features
- Tested, deployed, and monitored production features using Expo, Firebase, and Google Cloud Platform, validating API responses and application behavior across environments

CSUF Engineering Organization Fullerton, CA
Web Developer | Next.js, TypeScript, Tailwind CSS, Drizzle ORM *Aug. 2025 – Present*
- Owned end-to-end delivery of the chapter's official web platform built with Next.js, TypeScript, Tailwind CSS, and Drizzle ORM, shipping a live directory serving 60+ members with dynamic filtering and sorting
- Implemented secure authentication and email infrastructure using Clerk and Resend, shifting member management from manual processes to a scalable, self-serve platform across 10+ pledge classes

PROJECTS

TradeSim | React.js, Tailwind CSS, Python, SQLite, SQLAlchemy *May 2026*
- Built a live dashboard surfacing 3 real-time progress metrics across a paper-trading platform's 4 core learning modules
- Engineered the backend in a 2–3-person team, balancing normalized SQLAlchemy schemas with query simplicity and validating trade requests for missing inputs, invalid transactions, and duplicate updates

Nested | CSUF ESJ 1st Place | React Native, TypeScript, Kotlin, Swift *March 2025*
- Led development within a 5-person cross-functional team to build a healthcare mobile app streamlining patient monitoring and managing daily care routines across senior-care facilities
- Implemented real-time patient monitoring and automated caregiver alerts, connecting live patient data to assigned care tasks and improving visibility into patient status

Hydroponic Monitoring System | FastAPI, PostgreSQL, Raspberry Pi, HTML/CSS/JavaScript *Dec 2025*
- Designed the end-to-end data flow for pH, TDS, and water-level telemetry, mapping sensor ingestion, backend processing, storage, and dashboard delivery
- Built a real-time monitoring dashboard and 6 RESTful API endpoints, coordinating development, testing, and deployment within a Scrum workflow

LEADERSHIP

Association for Computing Machinery **Fullerton, CA**
Design Team Lead *Aug. 2024 – Present*
- Designed and delivered 10+ hands-on technical workshops on HTML, CSS, JavaScript, Figma, and Spline, building curriculum and demos for up to 20 students per session across a 4–6-person team
- Built a reusable workshop framework around modern frontend tooling, scaling beginner UI/UX and web development instruction for future ACM workshops
